TECHNICAL PRODUCT & PROGRAM LEADER | AI PLATFORMS | ENTERPRISE WORKFLOWS | DEVELOPER INFRASTRUCTURE

Technical product and program leader with 5+ years of product ownership across commercial hardware, AI-enabled enterprise workflows, and developer platforms. Combines product strategy, requirements architecture, cross-functional execution, and hands-on prototyping to turn ambiguous problems into executable roadmaps and shipped systems.

PRODUCT & PROGRAM EXPERIENCE

Product Manager | Phenotype | Santa Monica, CA

Oct 2020 - Present

- Owned end-to-end product and commercial operations across design, launch planning, e-commerce, fulfillment, and 10+ international vendors; generated more than \$400K in revenue in 30 days and reduced manufacturing costs by more than 25%.
- Built pricing, demand, and market-research models for launch and inventory decisions, and introduced AI-assisted workflows for specifications, documentation, QA, and engineering execution.

Lead Software Engineer / Technical Program Manager | Atoms.Tech | Tempe, AZ

May 2025 - Jan 2026

- Led a five-team program building an AI-driven requirements and systems-traceability platform; owned roadmap structure, PM workflows, development standards, and sponsor, legal, and IP coordination.
- Defined service boundaries, acceptance criteria, and SysML-informed traceability; built the delivery system around the product through an MCP service, CI/CD and QA infrastructure, and Discord, Coda, GitHub, and Jira automations.

Development Engineer, AI Innovation (DDAT / InnoTech) | CVS Health | Scottsdale, AZ

May 2025 - Aug 2025

- Won a company-wide innovation challenge across intern teams with a separate patient electronic prior authorization (ePA) proposal.
- Led discovery and architecture for an AI workflow-transpilation system that converted a manual process into an executable, human-validated agent workflow; completed a planned 10-week scope by week 3, advanced it to pilot, and presented requirements, rollout risks, and expected value to DDAT and Innovation leaders.

Lead Software Engineer | Akoma | Ithaca, NY

Oct 2023 - Jan 2024

- Led product development and delivery for an offline-first ERP/accounting application, coordinating requirements, architecture, and execution across the React Native team.

SELECTED PRODUCT LEADERSHIP

Tracera / AgilePlus | *Knowledge, traceability, and delivery governance*: Defined product vision, target users, prioritized epics, lifecycle state machines, requirements, evidence gates, auditability, and real-time workflows; designed hybrid retrieval across PostgreSQL full-text search, pgvector, fuzzy matching, Redis, and reciprocal-rank fusion.

AgentAPI++ / CLIProxyAPI++ | *Developer platform and enterprise integrations*: Shaped and extended a unified control and routing layer across 11 coding-agent CLIs and heterogeneous AI providers, covering sessions, streaming, authentication, request translation, model routing, quotas, diagnostics, and management APIs.

BytePort | *Self-service deployment and productization*: Defined and built a manifest-driven workflow connecting GitHub OAuth, secure sessions, AWS provisioning, endpoint registration, observability, and portfolio generation into one onboarding and deployment experience.

LEADERSHIP & TECHNICAL FLUENCY

Product: Vision and strategy, roadmaps, prioritization, PRDs and requirements, MVP and pilot design, AI workflow products, platform and integration products, pricing and demand modeling, market research

Program: Cross-functional operating cadence, dependency and risk management, stakeholder alignment, sponsor and executive communication, legal and IP coordination, release planning, CI/CD and QA gates

Technical: Go, Python, TypeScript/JavaScript, Rust, REST and WebSocket APIs, MCP, OAuth, PostgreSQL, Redis, pgvector, AWS, Docker, Kubernetes, GitHub Actions, OpenTelemetry, Prometheus

EDUCATION

Arizona State University | M.S. Computer Science, Expected Dec 2026, GPA 3.75 | B.S. Computer Science, Dec 2025, GPA 3.65 | Barrett Honors College
